

Press release 28 January 2010 - immediate distribution

Windows 7 multitouch applications to utilize unlimited touch points on LCD

Windows 7 multitouch applications can now make use of the unlimited touch points on LCD screens. MultiTouch Ltd's unlimited touch point LCDs now support Windows 7, in addition to other operating systems.

New native Windows 7 support opens up novel opportunities for Windows 7 application developers. The MultiTouch Cell is a modular and stackable LCD cell with built-in multiuser and multitouch capabilities. MultiTouch Cells are available in 32 and 46 inch sizes with Full HD 1920x1080 pixel resolution (2.1 MP).

MultiTouch LCDs, with optical, computer vision based touch sensing, support all Windows 7 multitouch features and enable operation of all Microsoft Touch Pack programs for Windows 7 applications.

LCD MultiTouch Cells are currently in use in more than 20 countries around the globe.
