

## MultiTouch strengthens commitment to Asia with new office & showroom

### Singapore premises consolidate Asian & Australian markets

**MultiTouch Ltd**, the world leader in interactive display systems, has announced the opening of a new, larger office and showroom in Singapore, further strengthening its commitment to the Asian markets with a planned expansion to its existing sales and technical support team. The showroom will include a permanent installation of the recently launched MultiTaction iWall, a 12x 55” turnkey multitouch wall, making its Asian debut, as well as MultiTaction display tables.

“We’ve always been committed to the Asian markets, and have maintained an office in Singapore since 2012” explains Petri Martikainen, CEO of MultiTouch. “This larger office, with the addition of a showroom to showcase our unique world-leading interactive products and applications, illustrates our further commitment to both Asia and Australasia. Further expansion to both staff and resources will follow.”

The new premises are situated here:

MultiTouch Asia Pte Ltd  
1 Maritime Square  
#09-55 Harbour Front Center  
Singapore, 099253

Official opening is 26-27 May, attendance by appointment, and by appointment thereafter. Interested parties should email [sales-asia@multitaction.com](mailto:sales-asia@multitaction.com)

The MultiTaction iWall is targeted for prestige installations for corporate lobbies, showrooms and high value public locations as well as professional productivity solutions. A complete turnkey solution, MultiTaction iWall combines a highly attractive multiuser application with proven MultiTaction displays, mounting structure and computing hardware. It is offered with professional installation, support and maintenance.

Highlighting the unique features of MultiTaction technology, including simultaneous touch, IR pen and object recognition, 200+fps tracking and Enriched Reality™, MultiTaction iWall also highlights MultiTouch’s Full HD, ultra-thin bezel displays, which result in a pixel-to-pixel gap of less than 6mm between adjacent screens, and produce high resolution images that remain clearly defined whether a user is on the other side of the room, or just inches away.

A video of the MultiTaction iWall can be viewed here: <http://vimeo.com/92710424>

#### **About MultiTaction**

Aimed at installations in retail, education, real estate, exhibitions and corporate use, MultiTaction® Cell multi-touch displays boast the world's most advanced interaction features and an ultra-fast 200 fps tracking, enabling the most engaging interactive user experiences to be deployed. Based on MultiTouch's proprietary Computer Vision Through Screen technology, MultiTaction® Cells are designed for multiple concurrent input methods, including fingers, hands, pens and Enriched Reality™: interaction with real-life objects, and can be stacked to create very large interactive surfaces in a variety of shapes to be interacted with by unlimited number of concurrent users. Full networking capabilities allow for cloud applications and social media integration as well as remote management and monitoring.

MultiTaction® is a registered trademark of MultiTouch Ltd.

#### **About MultiTouch Ltd**

MultiTouch is a leading developer of interactive display systems, based on proprietary software and hardware designs. The company is headquartered in Helsinki, Finland, with U.S. offices in Silicon Valley, California, New York City and an office in Singapore. The company's systems are currently in use in more than 50 countries around the globe. For more information, please visit [www.multitaction.com](http://www.multitaction.com)
